Holiday Checkers :: This is a spin off an old favorite.

Directions:: Print out game board and checker pieces onto card stock and laminate. The checkers will need reinforcement because they will be used quite a bit. A stiffer laminating material may be helpful.

The game pieces would be set up the same way as the standard version. The goal is for the players to get their pieces to the other end of the board. Red pieces move on red spaces, green pieces move on green spaces.

Variation: I thought that it might be neat to laminate a checker board (with clear contact paper) onto a metal cookie sheet and putting magnet strips on the back of laminated (and cut out) checker pieces.

Have fun!
